Slide show

CYCLOPS is a family of **video capturing** devices to read winning number from roulette wheel. It is not just high quality graphics to display winning numbers for your eye pleasure. It is not only state-of-art **video cam ball detection technology** which can read winning number within a second. It is also powerful **secure tool** which makes you sure that every spin on the roulette is correct. Devices are easy to install. **Push-Turn-Wait** technology let you set up the display in a minute. **All types of roulette** wheel with coloured or monochrome (black, green, red, orange) pockets are supported. The state of wheel and ball and all game events permanently transmitted into local network that allows you to connect any number of betting terminals. You can use own application to **collect and analyze statistic** data or you can use our **Venttsel** solution. **Ball detection and demonstration takes 1-2 seconds**. Product is **GLI approved**.
